

Owens Lake Dust Mitigation

■ Location:

Owens Lake, California

■ Pipe Used:

2-inch to 36-inch HDPE

■ Quantity of Pipe:

Several million feet in six phases

■ Type of Project:

Water supply for irrigation/sprinkler system to control dust in 30-plus-square-mile dried-out Owens Lake, which was causing respiratory problems for people in Bishop and Lone Pine, Calif. This project is the result of years of lawsuits against LADWP.

■ Duration of Project and Pipe Installation:

Ongoing since 2003
